

# ANIMAL QUIZ

▶▶▶▶ Get learners into teams of 4 to 5 and ask them to answer the 10 true or false questions below. You could ask each group to confer when a question is being asked and to put their hand up for the answer they would like to give.

▶▶▶▶ Example for question 1:

- Read the question: No animals can walk on water, true or false?
- Ask groups to discuss the answer they would like to give: true or false.
- Get one person from each group to give you the group's answer and write it down on the board.
- Repeat for all questions.
- Once all the groups' answers are on the board, give out the right answer and keep a record of the teams that have the correct answer.
- When the quiz is over, add up every team's points to find out which team came first, second and third.

## True or false?

▶▶ Question 1: No animal can walk on water.

**False-** there is a lizard in Central and South America that runs on water to get away from danger.

▶▶ Question 2: Some animal can laugh.

**True-** Rats laugh when they are being tickled but we just can't hear them.

▶▶ Question 3: Some animals can count.

**True-** African grey parrots can count up to 8 when they are trained.

 Question 4: Ostriches run faster than lion.

**True-** Ostriches run at 97km/h and lions run at 80km/h maximum.

 Question 5: Gorillas stick their tongues out when they're happy.

**False-** They do that when they're angry.

 Question 6: Horses rub their noses together when they want to say hello to each other.

**True-** They also press their lips together and make a sound to say 'hello'.

 Question 7: The stripes on tigers can also be seen on their skin.

**True-** And each tiger's stripe pattern is unique.

 Question 8: The biggest number of nuts that a bird can hide and find again is 50.

**False-** there is a species of bird who can hide up to 30,000 nuts and remember where most of them are hidden. (Some animals hide food before the weather gets cold so that they might find it again when all the food is gone.)

 Question 9: Dogs have the best sense of smell out of all the animals.

**False-** Elephants can smell water up to 4 km away from where they are.

 Question 10: All snakes are venomous.

**False-** there are 3000 different snakes on planet earth and only 600 are venomous.
