

INTERNATIONAL HOMELESS ANIMAL DAY

August 16th

13 to 16-year olds

Show learners the pictures of **Stray animals flashcards** provided and engage in the discussion below with them.

Ask learners how they think these animals survive: Where do they get their food from? Where do they sleep? What happens to them if they are sick or injured?

Discuss the relationships that they might have amongst themselves, looking at the pictures provided (dogs or cats being affectionate towards one another).

Ask Learners how people usually react towards stray animals (usually, this is negative).

Ask learners to produce a poster showing that stray animals are usually harmless and need to be left alone.
