

# WORLD FROG DAY INFORMATION SHEET

Ages 13 to 16

Please use the corresponding flashcards to present the following facts

**Flashcard 1:** As eggs, future frogs provide food for spiders (**flashcard 2**) and wasps.

**Flashcard 3:** As tadpoles, they provide food for dragonfly nymphs (**flashcard 4**), and shrimp (**flashcard 5**).

As tadpoles, they also feed on algae, which helps filter and keep water supplies clean.

As adult frogs, they provide valuable food for lizards (**flashcard 6**), iguanas (**flashcard 7**) birds (**flashcard 8**), monkeys (**flashcard 9**), and more.

Full-grown frogs feed on insects, such as flies (**flashcard 10**), disease-carrying mosquitos (**flashcard 11**) and grasshoppers / crickets (**flashcard 12**).
