

WORLD ANIMAL DAY

October 4th

13 to 16-year olds

Learners have a discussion about their favourite animals; they explain why they like these animals.

Learners then share their favourite animal facts with the rest of the class while the teacher makes notes on the board.

Learners then use all the information provided to write up a quiz; creating questions from the information written on the board.

Quizzes created can be swapped around for others to complete in the classroom or offered to other classes.
