

WORLD FARM ANIMALS DAY

October 2nd

5 to 7 -year olds

Get learners to name some of the animals that live on farms. To make it fun, show them just a detail of each animal from the **Farm animal flashcards** and get them to guess what each animal is. When the right answer is given, show the corresponding flashcard representing the full animal (from the **Farm animal flashcards** too) and stick each animal picture on the board as it gets correctly identified.

Once all the farm animal pictures are stuck on the board, get the learners to match each animal to what they produce for humans, by showing them pictures of the **What animals give us** flashcards.

Get the learners to pick their favourite farm animal and to create a corresponding mask, using the **Mask patterns**.
