

WORLD WILDLIFE CONSERVATION DAY

December 4th

8 to 12-year olds

Show learners the pictures of **Animals affected by plastic flashcards** and discuss what is happening in each picture and why.

Ask learners the following question: How does that make you feel? Can the animal in the picture still live a normal life? What can't they do anymore? How can we make sure this doesn't happen anymore?

Learners draw posters asking people to refrain from using plastic. Provide key words on the board and use the flashcards of animals for inspiration.

Organise for learners to pick up plastic within their community or just outside the school premises. You could also organise a weekly plastic picking up rota.
